

IDENTIFYING ANGLES FORMED BY TRANSVERSALS

A **transversal** is a line that intersects two or more coplanar lines at different points. For instance, in the diagrams below, line t is a transversal. The angles formed by two lines and a transversal are given special names.

IDENTIFYING ANGLES FORMED BY TRANSVERSALS

- $\angle 4$ and $\angle 8$ are _____ angles.
- $\angle 2$ and $\angle 6$ are _____ angles.
- $\angle 1$ and $\angle 8$ are _____ angles.
- $\angle 8$ and $\angle 2$ are _____ angles.
- $\angle 4$ and $\angle 5$ are _____ angles.
- $\angle 5$ and $\angle 1$ are _____ angles.
