

Transformations - Translations

Name: Key 1st

Translations

Movement of a geometric figure without changing the orientation or size of the shape.
Ex. Move something up, down, left, or right without rotation, reflection, or dilation.

1. Translate triangle EFG 8 units up and 3 to the left.

2. Translate Triangle ABC 8 units down and 5 units to the right.

3. Translate figure DEFG 2 units down and 10 units to the right.

4. Translate figure HJKL 8 units down and 4 units to the left.

Identify the transformation.

Reflections

Transformation where an image is reflected over a line of symmetry, like a mirror image.

- Reflection over the x-axis $(x, y) \rightarrow (x, -y)$
- Reflection over the y-axis $(x, y) \rightarrow (-x, y)$
- Reflection over $y = x$ $(x, y) \rightarrow (y, x)$
- Reflection over $y = -x$ $(x, y) \rightarrow (-y, -x)$

1. Reflect triangle ABC over the y-axis.

2. Reflect parallelogram DEFG over the x-axis.

3. Reflect trapezoid HJKL over $y = -x$.

4. Reflect quadrilateral MNPQ over $y = x$.

5. Reflect triangle EFG over the x-axis.

6. Reflect trapezoid HJKL over the y-axis.

7. Reflect triangle ABC over $y = x$.

8. Reflect parallelogram DEFG over $y = -x$.

Identify the transformation.

9.

reflects over $y = -x$

10.

reflects over the x-axis

11.

reflects over the y-axis

Transformations – Rotations

Name: _____

Key 3rd

Rotations

A rotation is a transformation in which a figure is turned about a fixed point. The fixed point is called the center of rotation. It can be rotated clockwise or counterclockwise.

- 90° Clockwise Rotation: $(x, y) \rightarrow (y, -x)$
- 90° Counter-Clockwise Rotation: $(x, y) \rightarrow (-y, x)$
- 180° Rotation: $(x, y) \rightarrow (-x, -y)$

1. Rotate 90° counterclockwise about the origin.

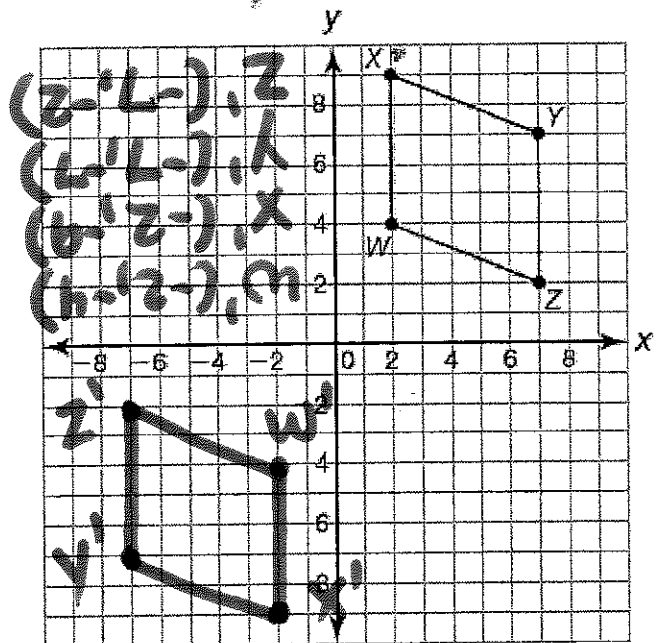

2. Rotate 180° about the origin.

3. Rotate 90° clockwise about the origin.

4. Rotate 180° about the origin.

5. Rotate 180° about the origin.

6. Rotate 90° clockwise about the origin.

7. Rotate 90° counterclockwise about the origin.

8. Rotate 180° about the origin.

Identify the transformation.
